

**Fondo GEMINI para el desarrollo de la Astronomía y Ciencias afines  
Proyectos aprobados Concurso 2009**

| COD      | Investigador       | Institución                              | Título del Proyecto                                                                                                                                                                |
|----------|--------------------|------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 32090002 | Jordanka Borissova | Universidad de Valparaíso                | Support for the Post-Doctorate Program in Star Cluster Group at University of Valparaíso                                                                                           |
| 32090003 | Leonardo Bronfman  | Universidad de Chile                     | A 1.2-m mm-wave Telescope for Scientific Training at Cerro Calan                                                                                                                   |
| 32090006 | Michel Cure        | Universidad de Valparaíso                | Observational and Theoretical Studies on Circumstellar Disks of Massive Rotating Stars                                                                                             |
| 32090009 | Gaspar Galaz       | Individual                               | Sabbatical Leave to the University of Washington: Adding the sub-mm window to the Local Volume Legacy Survey                                                                       |
| 32090010 | Douglas Geisler    | Universidad de Concepción                | Reinforcing Research in the Astronomy Department at the University of Concepcion                                                                                                   |
| 32090011 | Andrés Guesalaga   | Pontificia Universidad Católica de Chile | Laboratory for Astronomical Instrumentation at PUC                                                                                                                                 |
| 32090013 | Olga Hernández     | Sociedad Chilena de Astronomía           | First Chilean Astronomy & Astronautics Olympiad                                                                                                                                    |
| 32090014 | Radostin Kurtev    | Universidad de Valparaíso                | Brown dwarf research in Valparaíso - support for a new post-doc                                                                                                                    |
| 32090015 | Fernando Mendez    | Universidad de Santiago de Chile         | Enhancing Engineering and Teaching Education in Astronomical Science                                                                                                               |
| 32090019 | Verónica Motta     | Sociedad Chilena de Astronomía           | VIII Annual SOCHIAS Meeting                                                                                                                                                        |
| 32090021 | Nelson Padilla     | Pontificia Universidad Católica de Chile | Postdoctoral position for the Computational group of the Centro de Astro-Ingeniería PUC.                                                                                           |
| 32090023 | Patricio Rojo      | Universidad de Chile                     | CONICYT/Gemini Grants for the Master Astronomy Program at Universidad de Chile                                                                                                     |
| 32090025 | Eduardo Unda       | Universidad Católica del Norte           | Strengthening the astronomy interaction and productivity in the recently opened M.Sc. in Physics and Astronomy program at the Universidad Católica del Norte                       |
| 32090027 | Nikolaus Vogt      | Universidad de Valparaíso                | Astronomical Teaching, Research and Outreach at Universidad de Valparaíso, in collaboration with Universidad de Santiago and the Observatory Cruz del Sur, Combarbalá, 4th Region. |

\*Las modificaciones de presupuesto original, serán comunicadas mediante carta oficial.
